Senetas network encryption solutions are distributed and supported internationally by Gemalto.

CN SERIES, CERTIFIED HIGH-ASSURANCE ENCRYPTION

High-assurance encryption security for core Ethernet network infrastructure, without compromising network or application performance.

| | |
|--------|--|
| CN4000 | Compact, cost-effective 10Mbps-1Gbps Encryption |
| CN6000 | Rack-mounted, carrier-grade 1-10Gbps encryption |
| CN8000 | Multi-tenant, multi-link 10x 1-10Gbps encryption |
| CN9000 | Ultra-fast, 100Gbps ethernet encryption |

Multiple Security Certifications

High-Assurance Encryption

Designed-In Crypto-Agility

Uncompromising Network Performance

CV SERIES, VIRTUALISED NETWORK ENCRYPTION

The Senetas CV1000 is the world's first Layer 2 Virtualised Network Function (VNF) encryption appliance. The CV1000 Virtual Encryptor delivers robust encryption security for data-in-motion across virtualised networks and extended large-scale WAN and MAN links at up to 1Gbps. Unlike IPSec-type encryption solutions, the CV1000 is completely transparent to the network; making it the ideal solution to secure your WAN, right to the virtual edge.

Robust Encryption

Scalable & Flexible

Optimum Performance

Cost-Effective

SUREDROP, SECURE FILE SHARING, SYNCHRONISATION AND COLLABORATION

Only SureDrop® provides state-of-the-art encryption, key management and 100% file storage location control and security - without compromising users' file sharing and collaboration experience.

100% customer file location control

Easy, convenient and secure file sharing

Robust encryption security

Desktop, mobile and tablet compatible

SafeNet

ASSURED TECHNOLOGIES

GLOBAL DISTRIBUTION & SUPPORT

Senetas CN Series certified high-assurance encryptors are distributed and supported internationally as SafeNet CN Ethernet Encryptors.

Robust. Trusted. Simple.
