ASX ANNOUNCEMENT

Senetas obtains largest single order for its Ultra-High speed 100Gbps Ethernet Encryptor

Senetas Corporation Ltd (ASX: SEN) (Senetas), today announces that it has secured the single largest order for its Ultra-High speed 100Gbps Ethernet encryptors, the CN9000 series, through its global distributor, Thales.

The gross value to Thales of the order is approximately US\$2 million. The net revenue effect to Senetas will be a lesser amount, after allowing for cost of goods and margin to Thales. The CN9000 series encryptors will be deployed to secure the data in transit of a Middle Eastern government agency.

Senetas CEO, Andrew Wilson said: "This order is particularly pleasing as it underscores the strength and reputation of our global partner Thales in the Middle East. Most significantly for Senetas, an order of this size is a realisation of the considerable opportunity we have seen building in that market over the past 12 months, and now that pipeline is starting to deliver.

"With our increased presence in this market, and the potential for new opportunities via the pending European certification and custom algorithm encryptors for Eastern Europe, we continue to see exciting opportunities to further expand the market for Senetas products and expect good growth from these regions over the medium term."

Mr Wilson added: "This order also underscores the fact that Australian sovereign cyber security products are respected not only in Australia but world wide for their defence grade security profile and engineering."

This announcement was authorised for release by Andrew Wilson, CEO of Senetas.

ABOUT SENETAS

Senetas is a global leader in certified high-performance encryption security solutions. Senetas cybersecurity solutions are developed and manufactured in Australia. **Senetas high-speed encryptors** protect network data in transit without compromising performance. They include certified high-assurance hardware encryptors for core IT network infrastructure and virtualised encryption to the network edge. For secure user-friendly file sharing and collaboration, **SureDrop**

is the most secure application also providing 100% data sovereignty control and protection against malware and zero-day attacks.

All Senetas solutions share a crypto-agile and quantum-ready end-to-end encryption platform.

Senetas solutions are used to protect much of the world's most sensitive data, from enterprise, government, defence and intelligence agency data, to technology service provider and critical national infrastructure customers against data breaches and cyber-attacks. Leveraging end-to-end encryption, state-of-the-art key management and quantum-ready design, they provide long-term data protection without compromising network and application performance, or user experience.

Senetas encryption solutions are used in more than 40 countries. They are distributed and supported internationally by **Thales**, the world's largest security company.
